Personal Statement

A kind, highly creative and determined Junior Web Developer with a keen interest in technology.

I have recently completed an internship in Web Development and show a keen interest in Software Development. In my career I have primarily explored React.js and Node.js, however I have self-taught areas of Next.js and Python in order to progress into Full-Stack Web Development as well as React-Native and Electron to explore Software Development as a career pathway.

My journey into Web and Software Development and my background in Mechanical Engineering and Customer Service Management has provided me with a unique blend of skills. I offer a successful combination of technical knowledge, exceptional problem-solving and communication skills towards creative projects.

I have a proven track record in managing complex projects, leading diverse teams and enhancing operational efficiency. I thrive in creating structured, cooperative environments that promote innovation and productivity in line with objectives. My hands-on approach ensures meticulous handling of duties, allows me to adapt to new information and technologies quickly and to introduce intuitive solutions.

Web Development

Web Development Intern – IMPRESSO via Virtual Internships

Oct 2023 – Jan 2024

- Acquired experience with Web Development technologies in a dynamic environment.
- Collaborated directly with a diverse team of supervisors and peers to design and implement a user-friendly web interface.
- Time management was a necessity due to remote collaboration across multiple time-zones.
- Provided an intuitive solution of an operational guide for my direct supervisor to be able to edit and update the web interface in the future.

Front-End Web Development Bootcamp, Trilogy Skills

Dec 2022 - Apr 2023

- Completed the Skills Bootcamp in Front-End Web Development with Trilogy Skills to further my understanding after self-learning HTML, CSS and JavaScript.
 - Achieved a 100% grade in both individual and group projects, practicing a strong standard of work ethic and best practices with team-based GitHub repositories and project deployments.
-

Career History

Customer Service Manager – Ladbrokes Coral

Aug 2019 - June 2021

- Worked as part of the most productive team in the North-East of England, supervised other members of staff and frequently operated a large betting shop alone, with a handover between managers for different shifts. The capacity of the venue was twenty customers, which meant dealing with large workloads and time management with no assistance.
- Required to constantly monitor sixteen screens of information, nine gaming machines, every customer in the venue, and the main entrance for the many issues when they presented themselves, all while taking and processing hundreds of bets.
- Trusted with operating a database of personal details and disposing of them correctly when required by GDPR and also with keys to operate venues alone that were previously unvisited.
- Upheld the venue's performance standards, including the enforcement of PPE protocols for both staff and customers due to the events of COVID-19.
- Use of excellent empathic skills and emotional intelligence to handle sensitive situations and built rapport.

Education

Mechanical Engineering, The University of Sheffield

- Currently holding 300/360 Credits at a 2:1 standard.
- Ability to self-learn new information quickly with a positive work ethic.
- Strong problem-solving skills and working knowledge of a complex subject area.

Gosforth High School, Newcastle upon Tyne

A Levels

Mathematics	A ⁺
Further Mathematics	A
Physics	B
Chemistry	C

AS Levels

General Studies	B
-----------------	---

GCSEs

10 GCSEs: 2 Grade A's, 2 Grade As, 5 Grade Bs, 1 Grade C

Additional Skills

- My foundational strengths are Kindness, Creativity and Determination. I use these to maximize the full potential of any endeavour and aim to help people through what I create.
- I am proficient with computers, and have learnt how to repair technology both software and hardware for items such as desktops, laptops, mobile phones and smart watches.
- My hobbies include 3D modelling and printing, badminton and hosting boardgame events.
